1. The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or renders obvious the dimensional relationships as claimed. Although the relative sizes and dimensions of articles is usually given little weight, Applicant makes a good argument for unexpected results.

Applicant's persuasive argument is as follows:

"Thus, in this injection molded resin gear, the thickness (t1) of the rim is smaller than the thickness (t2) of the web, so that the shrinkage of the rim having the teeth can be decreased. In addition, the circumferential rib thinner than the web is solidified prior to the solidification of the web, and then, the web is solidified, so that the deformation of the web due to the decrease of the diameter thereof can be suppressed by the circumferential rib, which is solidified prior to the solidification of the web, due to the time difference in solidification of the molten resin. As a result, the shrink mark in the connecting portion of the web to the rim, i.e. in the substantially central portion in face width directions of the teeth, can be particularly decreased, so that shape error, such as total alignment error, can be decreased to more precisely form the injection molded resin gear."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Fenstermacher whose telephone number is 571-272-7102. The examiner can normally be reached on 10:30-7:00.
